The Portfolio

Investment in the Portfolio is via unitised debentures issued to the investor by the relevant U Ethical Company. Investors in debentures relating to the Portfolio do not have a beneficial entitlement to the assets of the U Ethical Companies.

UCA Growth rely on ASIC Corporations (Charitable Investment Fundraising) Instrument 2016/813. The terms and conditions of the debentures relating to each of the Portfolios are outlined in its Offer Document. An up-to-date copy of the terms and conditions for each of the Portfolios can be obtained from the U Ethical website or on request by contacting U Ethical directly.

Section 2: How the Portfolio works

Valuation and unit price calculation for the U Ethical Growth Portfolio

Valuations are performed on the U Ethical Growth Portfolio every business day. The value of each Portfolio is the total market value of all its assets less its total liabilities including accrued liabilities.

Investors in the U Ethical Growth Portfolio are issued unitised debentures relating to the relevant Portfolio. Each unit has a unit price which is calculated by dividing the total net assets of the Portfolio by the number of units on issue. For example, if \$1,000,000 of net assets is held and there are 1,000,000 units on issue, the unit price would be \$1.

The close-of-business unit price will be used for application or valid redemption requests received before 3.00 p.m. on a business day. Application or valid redemption requests received after 3.00 p.m. (or on a day other than a business day) are processed using the close-of-business price for the next following day. Applications will only be processed if accompanied by payment.

Transactions are suspended bi-annually to allow for completion of distributions to existing unitholders.

You can obtain further information about the unit pricing policy by visiting the U Ethical website or by contacting U Ethical directly.

Interest/income instructions

Distributions from the U Ethical Growth Portfolio can be paid to a valid nominated bank account or reinvested in the Portfolio.

Section 4: Risks of investing in the Portfolio

All investments involve risk. Selecting the right investment is important. U Ethical offers a range of investment options that cater for investors with different risk tolerances.

There are many types of risk as explained in the Offer Document. The Portfolio is suitable for investors seeking a high-risk investment over a medium to long-term investment horizon. As the Portfolio's investment strategy is high-risk, it is expected to produce a higher return relative to lower risk investments. The responsible entity does not guarantee a return on the Trust's investments. There is also no guarantee that past returns achieved by the Trust will continue into the future.

Section 5: How we invest your money

U Ethical determines the parameters for the investment decisions of the Fund. Details about the current investment mandate of the Portfolio are provided in Section 5 of the Offer Document.

The investment strategy is subject to U Ethical's ethical investment policy. U Ethical's investment process ensures that all investment decisions are in keeping with our vision to improve our world through the power of purposeful investing, and that they promote careful financial stewardship. This is achieved through the application of positive and negative screens, and engagement with companies—together with a focus on competitive economic returns and sustainability.

Ethical screen: Positive

Our positive screen seeks out companies that promote human welfare and dignity or environmental sustainability. Examples include companies producing goods or services that enhance the health and welfare of individuals and communities as well as companies producing goods or services that protect our environment.

Ethical screen: Negative

Our negative screen evaluates a company's products, services and practices to ensure they are not detrimental to society or the environment. U Ethical avoids investing in companies that:

- cause unacceptable damage to the natural environment
- infringe on human rights
- support oppressive regimes
- cause or perpetuate injustice and suffering
- have unacceptable occupational health and safety practices including disregard for minimum wage laws.

Our screening approach means we systematically exclude the following industries due to their inherent negative impacts:

- Thermal coal
- Unconventional oil and gas extraction
- Uranium for non-medical uses
- Armaments
- Gambling
- Pornography and adult entertainment
- Animal cruelty
- Alcohol production
- Tobacco manufacturing

However, we recognise that there are occasions when companies inadvertently violate these principles and make genuine efforts to rectify this. Furthermore, we may choose not to exclude a company where a contravention of the principles constitutes less than 5% of the company's revenue or earnings. In such instances, the contravention may be outweighed by significantly positive factors.

Ethical screen: Neutral

The majority of our investments are deemed neutral by our positive and negative screens. Investment decisions are made on the basis of normal investment criteria including:

- ensuring prudent financial stewardship, and
- meeting our clients' income and capital investment objectives.

You may obtain a copy of the policy from our website or by contacting the client services team.

Investment style

U Ethical follows an "active" investment approach with specified constraints for asset classes and securities, with the adoption of a top-down or macro-economic approach to asset allocation and security/equity selection.

Section 6: Fees and costs

Did you know?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns. For example, total annual fees and costs of 2 per cent of your account balance rather than 1 per cent could reduce your final return by up to 20 per cent over a 30 year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better investor services justify higher fees and costs. You may be able to negotiate to pay lower contribution fees and management costs where applicable. Ask the fund or your financial adviser.*

To find out more

If you would like to find out more, or see the impact of the fees based on your own circumstances, the Australian Securities and Investments Commission (ASIC) website (www.moneysmart.gov.au) has a managed investment fee calculator to help you check out different fee options.

This section shows fees and other costs that you may be charged in relation to your investment in a Portfolio.

UCAFM Companies do not pay any performance-related fees or commissions to financial advisors or to U Ethical or its staff.

Type of fee or cost	Amount ¹
Fees when money moves in and out of the Portfolio	
Establishment fee – The fee to open an account	Nil
Contribution fee – The fee on each amount contributed to an investment	Nil
Redemption fee – The fee on each amount redeemed from an investment	Nil
Termination fee – The fee to close an account	Nil
Management costs¹	
The fees and costs for managing your investment	Estimated to be up to 0.80% p.a. or \$400 for every \$50,000 you have invested
– Management fee – estimated to be up to 0.80% p.a. of the net asset value of the Portfolio	
Service Fees²	
Buy/sell spread	Estimated to be up to \$100 for every \$50,000 you invest or redeem
– U Ethical Growth Portfolio 0.20%/0.20%	

Footnotes

1. Unless otherwise stated, fees and costs disclosed in this section are inclusive of the net effect of GST, if applicable.
2. The buy/sell spread is set up to 0.20 per cent. This cost is passed on to investors when an investment or redemption is made in the Portfolio. It is estimated to be \$100 for every \$50,000 invested or redeemed.

Additional explanation of fees and costs

U Ethical retains the right to increase the management fee to a maximum of 1 per cent per annum without notice or approval from investors.

Example of annual fees and costs for the Portfolio

This table gives an example of how the fees and costs in the Portfolios can affect your investment over a one year period. You should use this table to compare this product with other products.

Example for the U Ethical Growth Portfolio: Balance of \$50,000 with total contributions of \$5,000 during the year.		
Contribution fees	Nil	For every \$5,000 invested there will be a \$0 charge.
Plus Management costs	Up to 0.80% p.a.	And for every \$50,000 invested you will be charged up to \$400 each year.
Equals total cost of Portfolio		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged up to \$400.*

*Fees and charges are deducted from income prior to distributions and not deducted from investment capital.

This example assumes management costs are calculated on the balance of \$50,000 with the \$5,000 contribution occurring at the end of the first year. Therefore management costs are calculated on a \$50,000 balance only. It assumes no market movement on the value of the assets and no reinvestment of income or redemptions made during the year. This example does not capture the impact of the buy/sell spread.

Management fees and custodian fee

The management fee, and any expenses that are reimbursed to U Ethical, are deducted before income is distributed. Therefore, fees and expenses will not appear as a deduction on income distribution statements.

There are no transaction fees or charges other than the buy/sell spread referred to in the unit price calculation for the U Ethical Growth Portfolio. The buy/sell spread is rounded to the nearest cent and this cost is associated with the acquisition and disposal of assets when units are acquired or redeemed.

The maximum management fee is 1.00 per cent per annum of the value of the U Ethical Growth Portfolio's net assets, payable at the end of each calendar month.

GST

Goods and services tax (GST) is not payable on the issue or redemption or transfer of investments in the Portfolios, as these are input taxed financial supplies for GST purposes. When the fees and costs are shown in this section (unless otherwise stated) the net cost of GST is included. If the GST rate or arrangements change, the total amount payable may change even though fees due to U Ethical are not increased.

Section 7: Taxation

Taxation position of the Portfolio

The Portfolio is Income Tax Exempt.

Australian Business Number (ABN)

Investors are required to quote their ABN which must be Income Tax Exempt Charity (ITEC) endorsed.

Imputation credits of the Portfolio

Imputation credits form part of the Portfolios' assets from the date the underlying securities held by Portfolio are quoted ex-dividend. As investors must be tax exempt, the Portfolio claims the imputation credits from the Australian Taxation Office. The cash equivalent of the imputation credits is passed on to investors in their income distributions. Imputation credits are included in the assets of the U Ethical Growth Portfolio for the purpose of calculating the unit prices of the investment Portfolio until they have been distributed, however, imputation credits on buybacks are not distributed and are retained as assets of the U Ethical Growth Portfolio.

The realised capital gains for the U Ethical Growth Portfolio are retained as assets of the U Ethical Growth Portfolio and are not distributed.
